I am disturbed to see that you are involved in this situation. I am a subscriber of X-M Radio and I love it. I pay my X-M bill before I pay my mortgage. My wife and I have been disgusted with the level of filth, excessive commercials and lack of music selection in our part of Texas. The best way we could combat the daily barrage of garbage presented to our children via the MEGA RADIO broadcasters was to switch them off completely. The claim of the radio broadcasters that X-M will hurt their business, well, of course it will. Not everyone in America wants to listen to 5 min. of music, then 15 min. of filthy, double ended jokes and potty mouthed humor. We spent more time trying to explain why we as parents were so upset at what was said than we did listening to any music. Whatever happened to fair/ equal competition in the marketplace? If big radio is losing out to Satellite radio then big radio needs to look inward at what is truly wrong and not take the easy way out and blame the new competition, or cry to the government to please save our millions of dollars from these big bad satellite companies. boo hoo. Please do not fall into this type of actions. Thank You for your time. James Kraft
